APPROVAL OF FINAL SITE ASSESSMENT REPORT ADDENDUM FOR FORMER UNDERGROUND STORAGE TANK (UST) 761B (SOILD WASTE MANAGEMENT [SWMU] 206) AND FORMER OIL WATER SEPARATOR (OWS) SITE 761A (SWMU 205), FORMER MARINE CORPS AIR STATION (MCAS) EL TORO

Dear Mr. Piszkin:

The Department of Toxic Substances Control (DTSC) has reviewed the subject document dated August 21, 2003. The document describes the additional May 2003 field activities and results for site assessment performed at SWMU 206, a Resource Conservation and Recovery Act (RCRA) Facility Assessment (RFA) site referred to as former UST 761B and former OWS 761A (SWMU 205). One additional boring was performed to further investigate the site because three previous soil borings were not located directly at the location of the former UST and OWS. The submittal is an addendum to the December 2002 Site Assessment Report for SWMU 205 and SWMU 206. OWS 761A had a capacity of approximately 100 gallons and UST 761B had a capacity of approximately 500 gallons. The tanks were installed in 1982 and received waste oil until they were removed from the site in February 2000.

Based on the results from the 2002 site assessment, the sampling analytical results were below residential cleanup goals. DTSC concurs with the findings and conclusions of the report and we hereby approve it.

Mr. F. Andrew Piszkin
